How can you use your property and assets to fund capital projects and generate income?

Morgan Sindall Investments is excited to announce that we will be at the Local Government Association's Annual Conference.

As part of our time at the LGA conference we will be co-hosting a stand with our partners Bournemouth Borough Council. We would like to invite you to see the work that we have been undertaking with Bournemouth to create their town centre regeneration vision, using their estate and assets.

We will also be part of a panel discussion, hosted by The Municipal Journal, about how Local Authorities can rise to the challenge of financing and funding education facilities, community projects and generating revenue through the use their current property and assets as well as more unusual funding methods. This event will take place in the Bayview Suite, at Bournemouth International Centre at 8am on Wednesday 6 July.

Please come and visit us on the stand we co-host with Bournemouth Borough Council, its P15 in the main hall. We will be happy to talk with you about our wider group offering as well as developments we are working on with other partners including Slough Borough Council, where we are delivering in excess of £87m of projects with a further £280m in the pipeline over the coming 5 years.

We hope to see you there.
